

Smart SOS Button (Zigbee 3.0)

User Manual

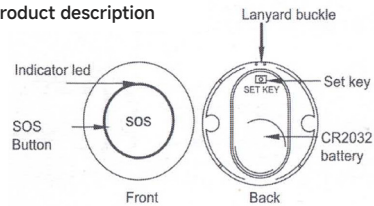

Please read the manual carefully and use the product correctly

Thank you for purchasing and using this product. Before using the product, please read the manual carefully & use the product correctly. In order to avoid damage to the equipment, such as all consequences caused by abnormal operation, the company will not bear any responsibility.

The pictures in this manual are used to guide the user's operation and are for reference only. Please refer to the actual product for details.

Product description

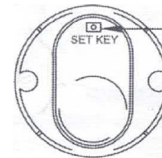

Network Configuration

- Open the back cover of the product and remove the insulation sheet, the indicator light will turn on for 3 seconds, indicating the device is powered on.
- Go to the "Add Device" section in the app → Select Gateway → Search Device (refer to the Zigbee Gateway/App manual).
- Press and hold the device "SET KEY" for 3 seconds until the indicator LED flashes rapidly. This means the device has entered network configuration mode. Wait for the app to confirm successful connection.

Tips:

- Zigbee sensors must be connected to a Zigbee gateway to work with the app.
- 433MHz sensors require a 433 gateway or alarm system to connect with the app.

Installation Instructions

The panic button can be mounted on walls, desktops, or any surface within the gateway signal range. It can be fixed using double-sided tape or worn using a lanyard.
